RESEARCH PROGRAMME - PLANNED WORK
Adapted from the lab project document. Objectives and applications are plans, not completed research findings.

Research Methods & Talent Development - Research programme

01 / Scope

Connect causal inference and design science with AI prototyping, business analytics education, and doctoral research.

02 / Research questions

How can observational data support credible causal inference?
How can design-science prototypes address business questions?
How can research projects support interdisciplinary education?

03 / Planned applications

Causal research designs
Design-science prototypes
Business analytics and doctoral training

04 / Status

Adapted from the lab project programme. Research objectives and applications are plans, not completed findings or deployed systems.
