RESEARCH PROGRAMME - PLANNED WORK
Adapted from the lab project document. Objectives and applications are plans, not completed research findings.

Smart Finance & Alternative Data - Research programme

01 / Scope

Investigate large-model methods, quantitative strategies, and alternative data for financial prediction and interactive investment support.

02 / Research questions

What information do hiring demand and venture-capital networks add to prediction?
How can deep learning use unstructured data to study startup success?
How can interactive systems understand investor needs and risk preferences?

03 / Planned applications

Alternative-data modelling
Interactive investment-support prototypes
Startup and asset-performance research

04 / Status

Adapted from the lab project programme. Research objectives and applications are plans, not completed findings or deployed systems.
